ENVIRONMENT - RESOURCES - INDUSTRY

Environmental Ideas

**Industrial and Environmental Engineering,
specialist Consulting and real services.**

ASSUMPTIONS

Globalization of markets has led the Industry to produce using external techno structures for the management of complementary activities to the real production, so that the energies of the internal management can be devoted almost exclusively to the optimization of the same production-cycle and to the research of the best marketing strategies, aimed at getting a company's competitive position and of the finished product on the market.

Following the aim of optimizing the use of internal resources, and therefore also with the aim of simplifying the relationship with suppliers of services which are complementary to the "core business" of the Industrial production - however essential- in order to ensure maximum business efficiency, have always been favored that kind of suppliers which can offer - for specific areas of activity- performance as "Global Service", on a level of quality of great texture and, at the same time, offered at extremely competitive costs. This is possible thanks to multi-disciplinary organization, capable of operating across the board, with interactive and highly synergetic methodologies

Based on the assumption described above, in 1988 was founded PROGEST, a company of Integrated Technical Services, able to offer its customers an activity such as "Global Service", thanks to the availability of a technical team carefully selected and qualified. Progest also avails of Means, Plant and advanced Tool and Equipment for the solution of various problems related to the Environment and Safety through the support of real services, Consulting and Engineering and also through valid operating procedures in accordance with the guiding principles of law.

SERVICES

PROGEST operates in the Industrial and Environmental Engineering's field also combined with a specialized Consulting and real services, developed in the professional sphere of the Environment and Safety on the workplace.

Confrontation carried out over the years with our major clients operating at a national and International level such as SNAMPROGETTI of Fano (PS), ANSALDO ENERGIA of Genova and E.G.L. of Zurigo, has provided PROGEST of primary references on the performed activities, which render it, without any doubt, a techno structure of reference to deal and solve the typical problems of the Industry Environment and Safety.

INDUSTRIAL AND ENVIRONMENTAL ENGINEERING

PROGEST has developed, since the earliest years of its formation, significant activities concerning the general field of Industrial and Environmental Engineering, gaining great professional experiences that include the partnership with different technostructures of a national and international level.

PROGEST, which employs a technical team with large experience and professionalism, is equipped with modern hardware design stations supported by the best software available on the market which allows to offer an high quality of Engineering activities services.

Client

**SNAMPROGETTI S.p.A.
Fano (PS)**

Performed activity

Executive project to enlarge the sewage treatment plant of Acerra-Pomigliano (potential plant 600.000 ab/eq), Acerra (NA).

Total project value:
13,2 MI/eur

Client

**MAGRINI GALILEO S.p.A.
Milano**

Performed activity

**Executive project
Plant MT/bt Italian
Center of Aerospace
Research of Capua (CE).**

Total project value:
5,5 MI/eur

Client

**ANSALDO ENERGIA
S.p.A. - Genova**

Performed activity

**Supervision and Static
Test of construction
works of Combined
Cycle Thermoelectric
Power Plants of 800 MW
each.
Sparanise (CE) and
Rizziconi (RC).**

Total projects value: 800
MI/eur

ENVIRONMENTAL AND SAFETY CONSULTING FIELD

In this particular area of specialization, PROGEST has developed many activities and gained a large experience in various fields of intervention. PROGEST has supported clients in solving specific complex problems. This happens thanks to an internal eclectic and multidisciplinary organization and through the use of a set of tools and equipment of modern design.

Concerning to the specific field of Safety on the workplace, have been redacted several documents on risk assessment, in accordance with the Italian legislative decree 81/08 and further integrations, for companies operating almost in all sectors of manufacturing and services, consisting of different sizes, from 5 employees up to companies of 550 employees and over.

Client

**AMMINISTRAZIONE
PROVINCIALE DI
CASERTA**

Performed activity

Study conducted to identify the quality of the sludge deposited on the bottom of the Lake Falciano del Massico. Oasis of national interest, to determine the causes of anoxia of this lake.

Client

**MONTEFIBRE S.p.A.
Milano**

Performed activity

Monitoring of airborne micro-pollutants (S.O.V. and dust), microclimatic, photometric, and luxometric surveys, inside the chemical factories of Ottana, province of Nuoro.

Client

**NOVARTIS FARMA S.p.A.
Torre Annunziata (NA)**

Performed activity

Study conducted with the aim to verify the presence of airborne asbestos fibers in the factories of Torre Annunziata (NA).

Specific Fields where PROGEST operates, may be summarized as follows:

- Industrial and Environmental Engineering;
- Consulting nel settore ambiente e sicurezza;
- Start-up, management and maintenance of ecological plants;
- Storage and disposal of hazardous and non-hazardous waste;
- Environmental remediation.

START UP, MANAGEMENT AND MAINTENANCE OF ECOLOGICAL PLANTS

The management of ecological plants on behalf of third parties has been, without doubt, for at least the first 5 years of PROGEST 's life, the main niche market in which it has developed the business activity of the company.

PROGEST has become in fact, also thanks to the professional experience gained by the founders, a primary point of reference for companies of international calibre, those who have built and managed the consortium treatment plants designed and funded by the ex company CASMEZ within the Special Project of Decontamination of the Gulf of Naples, PS3.

Client
MAPI ACQUE S.p.A.
Napoli

Performed activity
**Start-up and conduction
line of Tertiary treatment
of the West Naples
plant (potential plant
1.200.000 ab/eq), in
Cuma, Pozzuoli (NA).**

Client
SNAMPROGETTI S.p.A.
Fano (PS)

Performed activity
**Start-up and
management of the
Treatment process
of the analysis
laboratory and the
treatment of the North of
Naples plant (potential
plant 800.000 ab/eq), in
the Municipality of Orta
di Atella (CE).**

Client
SOGESID S.p.A.
Roma

Performed activity
**Conduction of processes
and supervising of the
operating treatment
plant management
within the area of Acerra
– Pomigliano -(potential
plant 500.000 ab/eq),
in the Municipality of
Acerra (NA).**

STORAGE AND DISPOSAL OF HAZARDOUS AND NON HAZARDOUS WASTE

PROGEST, in the year 2000, was authorized to realize and manage an integrated platform for the disposal of hazardous and non-hazardous waste, solid and liquid, on a plot of 15,000 sqm in the area ASI Aversa Nord, Municipality of Gricignano di Aversa (CE).

The platform became operational during the following year 2001, and today is still certainly a primary reference within the regional area for waste disposal, with particular reference to the liquid state matrices, thanks to the availability of an internal line dedicated to the treatment of the potential of 1.000 cbm/per day.

Client
ASTIR S.p.A.

Performed activity
Collection, transportation and disposal of hazardous and non hazardous waste from areas belonging to the municipalities of SIN Litorale Domitio Flegreo.

Client
S.E.P.S.A. S.p.A.

Performed activity
Collection, transportation and disposal of hazardous and non hazardous waste coming from railway stations and vehicle depots.

Client
GENERAL COSTRUZIONI S.p.A.

Performed activity
Collection, transportation and disposal of hazardous and non hazardous waste coming from the management of Combined Cycle Thermoelectric Power Plants of Sparanise (CE) and Napoli-Levante.

ENVIRONMENTAL REMIEDIATIONS

After gaining experience of primary interest in the field of Consulting and Engineering to complete a complex process of professional and entrepreneurial development, PROGEST has also structured a division specifically dedicated to the “real services”, of high technological content, like the environmental remediation.

After gaining experience of primary interest in the field of Consulting and Engineering to complete a complex process of professional and entrepreneurial development, PROGEST has also structured a division specifically dedicated to the “real services”, of high technological content, like the environmental remediation.

In particular for asbestos, where there are 500 references, PROGEST is well structured with specialized personnel in possession of necessary health permits. Progrest has 3 decontamination units that allow to execute several works at the same time, in addition to all the -not listed- equipment.

It has recently been executed an important remediation of a contaminated site to be subject to an industrial reversion, by removal of more than 21.000 tons of soil, contaminated with heavy hydrocarbons.

Client
PROGETTO INDUSTRIE
s.r.l. - Caserta

Performed activity
Remediation by removal, packing and landfilling of about 85,000 square meters of roofing and side panels made of cement, asbestos-eternit and thermal insulating sheaths, free from asbestos. Remediation executed to the Sites of ex Saint Gobain in Caserta.

Client
ENEL S.p.A.

Performed activity
Remediation by removal, packing and landfilling of warehouse special hazardous and non hazardous waste of via Galileo Ferraris in Napoli, including friable asbestos pipe insulation removal.

Client
TIRRENO POWER S.p.A.

Performed activity
Emergency safety plan actuated by removing approximately 21.000 tons of fuel oil-contaminated soil (with heavy Hydrocarbons) at the power plant of Napoli Levante – Vigliena, Municipality of Napoli.
